

Rutgers EcoIgnite & PureSpinach

Sustainable Food Systems

2018 Summer Internship

Rutgers EcoComplex/EcoIgnite & PureSpinach encourage students to apply for an internship to learn about next generation food systems and cutting edge processes in Controlled Environment Agriculture.

We are looking for individuals with experience in academic style research with a high level of interest in hydroponics & food production. Area of study in Engineering or Plant Science is preferred. The role entails participating in weekly operations, as well as taking responsibility of research projects on site.

Eligibility:

- Undergraduate or graduate students in Agriculture and Life Sciences, Engineering and related field with knowledge and interest in process management and sustainable food production.
- 3.0 GPA or higher with strong analytical skills and ability to engage in physical activity in a production setting.

Internship is at PureSpinach* (Element Farms, Inc.) located at the Rutgers EcoComplex**

Application: Submit your resumes by latest 4/25/2018 to sg795@njaes.rutgers.edu
