Potential Agrivoltaic System Developers

This is a list of companies that claim to offer agrivoltaic systems for farmers in NJ. Rutgers does not endorse, or in any way, imply that we recommend these companies, rather it is a means for farmers to investigate the application of agrivoltaics on their farm. They are included on the list because they contacted Rutgers and asked to be on it. They are listed in alphabetical order.

Ameresco, Inc.
www.ameresco.com
